

Common Health Conditions - Level 2

On demand

Study Mode: Online / Location: Offsite

[Common Health Conditions Level 2](#)

Every hour, someone in the UK is told that they have Parkinson's disease, there are approximately 152,000 strokes in the UK every year (more than one every five minutes) and one in six of the UK population have some form of hearing loss. These health conditions, along with others such as arthritis and dementia, affect a substantial proportion of the population. A good understanding of common health conditions is essential in any care environment.
